Att: TO WHOM IT MAY CONCERN

Our firm Chrysanthou & Chrysanthou offers services in the areas of Company & Commercial, Offshore, Trusts, International Tax, Banking and Finance (Ship & Corporate), Intellectual Property (Copyrights, Trademarks, Patents) and Commercial Litigation. One of our fields of services is related to the provision of company and fiduciary related (offshore and onshore) to our customers. In our work we have encountered the problem of management of these companies and related information for them. For example, the need to store the historical structure of these companies under management, their organizational structure (directors, secretaries, etc.) and their ownership structure including information about the beneficial owners and nominee shareholders has become apparent. Without automation this task would have been very complicated and complex.

We have sought IT support from IT Co. a software development company at 2004. We have selected this company for collaboration after receiving several good recommendations from our business associates.

With the enterprise Companies Management System, created by IT Co., we have solved the most of our problems, related to IT companies' management. The system was installed in our office by a specialist from IT Co. which is now in full operation. This system is stable, easy to use and to maintain, and IT Co. provided good support for it. Should we ever require any additional IT support we shall definitely choose IT Co. to undertake the task.

Yours truly,  
CHRYSANTHOU & CHRYSANTHOU

---

Nicos C. Chrysanthou
